## SPECIFICATIONS

|                                    |                 |
|------------------------------------|-----------------|
| <b>Wen of the cheidplattenform</b> | 80°             |
| <b>freewinkel</b>                  | 0°              |
| <b>Toleratz</b>                    | 0,130mm         |
| <b>Klemmtyp</b>                    | U               |
| <b>Schneidelänge</b>               | 0,8mm           |
| <b>Plattendicke</b>                | 0,6mm           |
| <b>Eckenradius</b>                 | 0,8mm           |
| <b>Kattenpräparation</b>           | ground Schneide |
| <b>Drehrichtung Tool</b>           | Rechts          |
| <b>Spatbrecher</b>                 | MM4             |

**Werte**

**Anwendungsbereich nach Werkstoffgruppen**

This chart maps the tool's application across different material groups (Aluminum, Steel, Inconel, etc.) and their respective hardness ranges (HRC, HB, etc.). The tool is shown to be suitable for a wide range of materials, including soft to medium-hard steels and non-ferrous alloys.

**Werte**

**Anwendungsbereiche nach Material**

This chart provides a detailed breakdown of the tool's application ranges for specific materials. It includes data for various grades of Aluminum, Steel, and Inconel, indicating the recommended cutting parameters and the tool's performance characteristics for each material.
